Prepared as a practical portfolio sample demonstrating transaction recording, account classification, trial balance review, and preparation of financial statements.

Note: This is a simulated practice company and reporting period. The portfolio presents the records supplied in the original PDF.

01 | Project Overview

This project documents a one-month bookkeeping cycle for PT Digital Solution Finance using Mekari Jurnal. The work covers the recording of January 2026 transactions and the review of the resulting accounting reports.

Project objectives

• Record owner investment, operating expenses, service revenue, receivables, payables, equipment purchases, drawings, and depreciation.
• Review the debit and credit totals through the Trial Balance and Journal Report.
• Present the business result and financial position through the Profit & Loss and Balance Sheet reports.
• Review cash movements and changes in owner's equity for the reporting period.

Scope and source

The figures and account labels in this portfolio are taken from the uploaded Mekari Jurnal reports. The source file contains six report types: Journal Report, Trial Balance, Profit & Loss, Balance Sheet, Cash Flow, and Statement of Change in Equity. A separate company profile, standalone Chart of Accounts listing, and General Ledger report were not included in the supplied PDF.

Reporting workflow

1. Transaction recording	2. Posting and checking	3. Financial reporting
Enter January transactions in the accounting system.	Review journal entries and trial balance totals.	Generate and review financial statements.

The following pages contain the original accounting reports, reorganized into a more logical review sequence. Report contents and amounts remain unchanged.

Review note

The supplied reports show that the Trial Balance is balanced at IDR 71,500,000 on both debit and credit sides. The Balance Sheet also balances: total assets of IDR 61,250,000 equal total liabilities of IDR 2,000,000 plus total equity of IDR 59,250,000.

The Office Supplies account is reported as a current asset of IDR 1,000,000 in the supplied reports. No adjustment reducing this balance is shown in the uploaded Journal Report; therefore, this portfolio retains the reported figure.
